

turn room into space ...

LiftBed – Creating Space for Living

It looks like magic:
At the push of a button, you transform one room
into another. Endless possibilities at your fingertips...

LiftBed is a creative solution to your space problem.
When you no longer need your bed, just push the button
and in seconds it disappears quietly and smoothly into the
ceiling.

LiftBed's innovative design transforms your bedroom or
guest room into a home office, playroom, or spacious living
room.

The LiftBed principle is both amazingly simple and ingenious: At the push of a button your luxury bed glides gently into the ceiling – making room for your individual requirements.

LiftBed is today's solution to a growing future problem:
Optimal utilization of valuable living space.

*From home office, meeting room or
living room to luxury bedroom in
seconds.*

*At the push of a button LiftBed
realizes your personal vision of living.*

Property prices keep rising in crowded cities
and holiday resorts.

At home: Bedrooms are used only a few hours
a day, personal workrooms are scarcely used,
and guest rooms stand empty most of the year.

At hotels: Expensive hotel rooms remain
unused half of every 24 hours. Most guest
rooms are in use only at night. Who wants to
spend the day in a room with a sizeable double
bed taking up most of the space?

LiftBed is your economical solution.

LiftBed in hotels ...

LiftBed makes a suite out of your regular hotel
room: The Push-Button Suite!

Here your guest can live and work comfortably
or invite others for meetings.

... for your home

During the day LiftBed transforms your
bedroom into a spacious children's room, a
home office or a second living room.

With LiftBed your workroom turns into a
guestroom whenever you need one.

... for your vacation home

Even on vacation the sun doesn't always shine!
LiftBed converts your bedroom into a cozy living
space for your daytime pleasure.

... in small apartments

Get a good night's sleep with LiftBed, then enjoy
the extra space and flexibility during the day.

LiftBed creates that badly needed second room!

More Room for Comfort

1]

2]

3]

4]

With LiftBed you're not talking about a daybed, fold-away bed or bulky piece of furniture (e.g. wallbed) which requires time and energy to put together just to get a bad night's sleep. If you wish, LiftBed can be your very own luxury bed. And when you're not using it, watch it slide smoothly into the ceiling at the push of a button.

By choosing LiftBed, you're creating a generous space for your own individual needs. This newfound space is now completely at your disposal!

1]

During the day your LiftBed stays out of sight inside the ceiling.

2]

From work-, play- or living room to luxury bedroom in seconds.

3]

LiftBed's neutral design fits in with any décor.

4]

LiftBed meets all your practical and aesthetic requirements.

Personal Flexibility -
Live and sleep comfortably in one and the same space.

LiftBed is constructed from a high-grade aluminium frame suitable for all standard slatted frames, mattresses or futons. Enjoy the kind of healthy, restorative sleep you're used to.

Lifting Mechanism

At the centre of LiftBed – the Push-Button Suite – is a fully free-floating bed, supported by two slim columns at the bed-head. Tucked away inside these columns is the complete mechanism responsible for moving the LiftBed up and down silently and in seconds.

Power

LiftBed is powered by an electric motor which remains out of view in the guide columns along with the control mechanism.

Design

LiftBed's neutral design fits in with every aesthetic requirement.

The 'Invisible' Bed

As required, LiftBed completely disappears into a dropped or partially dropped ceiling. LiftBed's guide columns are designed to harmonize with decorative paneling as well as with more functional wall units.
